PEAS *Lincoln*

Introduced before 1908, these were also known as the Homesteader. The 50cm.

Plants produce 8 to 10cm pods that are green coloured peas with a sweet flavour.

Plant as soon as the weather is mild. Plant as soon as the weather can be worked. Sow seeds 10cm apart.

They will keep for 3-4 days.

Pollinator Garden Planting Instructions:

- 1) Have a grown-up help you pick out a sunny spot in your garden with well-drained soil. This means it's not clay

soil. If the water will pool and seeds will rot, it's not a good garden? Plant your seeds in a pot on the side of your deck or balcony.

Plant on top of the soil.

Mix with soil.

Water in by watering it in dry times
